

Sprint reflection 7  
context: Health Informatics  
group: 3

User story	Task	Task assigned to	Estimated effort	priority	Done	actual effort	done by	note
As a user I want to be able to specify the input	Wizard for xml file	Paul	8	very high	no	12	Paul	Not fully finished, pull request expected soon
	count from end of file	Paul	3	very high	yes	4	Paul	
As a user I want to be able to save files and specify wich part of the datamodel should be saved.	wizard for saving files, what contents of the model should be saved.	Chris, Paul	8	low	yes	8	Chris	pull request to be finished + date format must be specified
	sort process	Louis	3	medium	yes	9	Louis	
	save tabel	Jens	2	high	yes	3	Jens	
	column filter	Jens	4	medium	yes	4	Jens	
As a user I want to be able to perform functions	nullvalues	Louis	8	high	yes	9	Louis	
	parse functions	Boudewijn	8	medium	yes	3	Boudewijn	
	group by	Boudewijn	4	medium	yes	4	Boudewijn	
	date time functions	Boudewijn	4	high	yes	10	Boudewijn	Values needed edit
As a user i want to see the table I am working with and plot that data to a graph.	tables with same name	Boudewijn	2	medium	yes	1	Boudewijn	
	code in table	Paul	4	high	yes	3	Paul	
	datum formats	Paul	4	medium	no	4	Paul	
	boxplot	Chris	8	very high	yes	10	Chris	
	state transition matrix	Chris	14	high	no	7	Chris	Does not work; start is here.
	parser errors	Boudewijn	3	medium	no	3	Boudewijn	most errors are there.
As a user I want to be able to combine two tables, by connection or via join.	connections	Jens	10	high	yes	4	Jens	Join is used for this, was more complex to implement.
	comparison	Louis	10	very high	no		Louis	early deadline extended because the join is nice to have for the comparison.
	union	Jens, Boudewijn	5	high	yes	1	Boudewijn	
	joins	Jens	5	low	yes	18	Jens	

Priorities are given by deadline set by group.

very high priority = finished after this weekend

high priority = finished Tuesday

medium priority = Wednesday

low priority = Thursday

## additional tasks

Task	Task assigned to	Estimated effort	priority	Done	actual effort	done by
parse join				yes	1	Boudewijn
parse connections				yes	1	Boudewijn
parse sort process				yes	1	Boudewijn
metadata in table				yes	5	Paul
refactor reader				yes	4	Paul

## Issues

The date values in the exel file format did not match our internal date format.
The order of deadlines for some tasks turned out to be not so practical. Therefore the comparisons were moved forward in the planning and the join had to be finished earlier.
